**FOR IMMEDIATE RELEASE**

## **SB TACTICAL™ Adjustable MPX PSB™ and SBPDW™ Available Late Summer**

**Saint Petersburg, Fla. (August 11, 2016)** – SB Tactical™, inventors and manufacturers of the Pistol Stabilizing Brace™, is pleased to announce that the much-anticipated 3-position adjustable braces, the MPX PSB™ and SBPDW™, are set for consumer availability by late summer. Installation of one of the new adjustable braces does not change the classification of a pistol in accordance with GCA provisions.

Designed solely for the AR pistol platform, the SBPDW has an MSRP of \$299.99. It weighs in at 18.14 ounces, measures 5.50 inches in length and has a max width of 2.25 inches. Designed in conjunction with Maxim Defense, the SBPDW adjustable brace is a complete assembly, allowing the customer to use standard bolt carrier groups and buffers.

The MPX PSB has an MSRP of \$249.99 and is designed exclusively for the SIG SAUER® SIG MPX™ and SIG MCX™ line of products. The MPX PSB weighs 19.13 ounces, is 8.0 inches in length and has a max width of 2.25 inches.

“SB Tactical’s commitment to emerging technologies and innovation has been the facilitator for the growing PDW pistol category,” said Jeff Creamer, Vice President of Business Development, SB Tactical. “This is an exciting time for us and the PDW community; we are proud to introduce the MPX PSB and SBPDW models. Initial reception and consumer interest has been off the charts.”

The Bureau of Alcohol, Tobacco, Firearms, and Explosives (BATFE) approved the innovative, adjustable design of these two new Pistol Stabilizing Braces for PDW pistols in December, 2015, which encouraged SB Tactical to rapidly accelerate the development of the two new adjustable brace models.
