**FOR IMMEDIATE RELEASE**

## **SB TACTICAL™ INTRODUCES THE SBT5A™ and SBT5KA™ SIDE-FOLDING PISTOL STABILIZING BRACES™**

**Saint Petersburg, Fla. (November 30, 2017)** – SB Tactical™, inventors and manufacturers of the Pistol Stabilizing Brace™, is pleased to announce the **SBT5A™** and **SBT5KA™** as two new additions to the SBT™ Series of integral, side-folding braces for HK pistol platforms. The SBT5A and SBT5KA do not change the classification of the host pistol in accordance with GCA provisions.

The SBT Series of Pistol Stabilizing Braces was designed after the iconic B&T stock developed for HK platforms. These side-folding braces enhance usability and enable large frame pistols to remain compact for ease of transport, storage, and concealability.

The new SBT5A and SBT5KA feature machined 6061 hard-coat anodized endplates and integral, side-folding mechanisms capable of accommodating a greater multitude of calibers (9mm, .40S&W, .45ACP, 10mm, 5.56 NATO, and 300BLK). Additionally, both models now include a machined QD socket for sling attachment.

Now shipping, the SBT5KA is designed for HK MP5K/SP89 clones and the SP5K. It weighs-in at 15.75 ounces and measures 10.5 inches. The SBT5A, which will be shipping by the end of the year, is designed for MP5/MP5K reverse stretch clones. It weighs 14.25 ounces and also measures 10.5 inches.

The SBT Series of braces come ready-to-install, are BATFE compliant, U.S. Veteran-designed, and proudly made in the U.S.A.
